# PUMPS AND PUMP SYSTEMS FOR DATA CENTERS

MAY 2026

# PROPOSAL SUMMARY

The Gorman-Rupp Company is a US based publicly traded (NYSE: GRC) Pump and Pump Systems manufacturer that produces high-quality products for application across numerous end markets. In 2025, Gorman-Rupp reported \$682M in annual revenue at an after tax profit of \$53M. This marks the 92<sup>nd</sup> consecutive year of profitable and stable growth for the Company. Gorman-Rupp's 2025 Annual Report can be found at:

[https://www.gormanrupp.com/hubfs/Gorman-Rupp\\_AnnualReport\\_2025.pdf?hsLang=en](https://www.gormanrupp.com/hubfs/Gorman-Rupp_AnnualReport_2025.pdf?hsLang=en)

Currently, Gorman-Rupp and its subsidiaries produce pumps that are actively in use in data centers throughout the world and in these applications:

- **Fire Suppression:** UL/FM rated fire pumps supplementing pressure and flow in sprinklered fire suppression systems
- **HVAC:** Pumps that circulate boiler and chiller water for ambient temperature control
- **Chip Cooling:** Pumps that circulate coolant through on chip cooling via CDUs – whether in server racks, near server racks, or at the end of server rack rows
- **Water Supply:** Pumps for supplying/pressurizing water from municipal grids to data center sites
- **Wastewater Transport:** Pumps for transporting waste water away from data center sites to wastewater treatment plants
- **Fueling/Fuel Transfer:** Pumps to fuel stand-by backup generators during operation and construction equipment during facility construction

We manufacture our products in a network of 18 factories around the world. Pumps for data center applications are manufactured in 8 existing facilities across the United States, using supply chains which are far more US-centric than the broader pump manufacturing industry.

We own those 8 manufacturing facilities and continue to reinvest annually in their capabilities. Each:

- Has ample capacity for growth to support data center and other growing pump applications
- Continues to grow in manufacturing volumes and is easily accessible via long Is supported through existing and stable access to utilities (Electric, Water, established logistic channels (FTL, LTL, Container, Parcel)
- Is supported through existing and stable access to utilities (Electric, Water, Wastewater, Natural Gas) necessary to foster current and future business levels
- Benefits from being owned by a 90+ year old publicly-traded company and operated with a family-run mindset focused first on taking care of customers
- Reinvests annually through existing cashflows to continue to expand capacities, increase efficiencies, and produce the pump industry's highest quality products

Gorman-Rupp stands ready to support data center needs and can *already do so* through our existing footprints, expanding internal capabilities and capacities, US-centric supply chains, and a broad world-wide support network of hundreds of factory-trained experts who are on call to provide support when challenges arise in the field.

The appendix information covers pumps by each Data Center application. We look forward to participating in discussions about your interests and our capabilities, including hosting site visits at any of our facilities.

# TYPICAL DATA CENTER PUMP APPLICATIONS

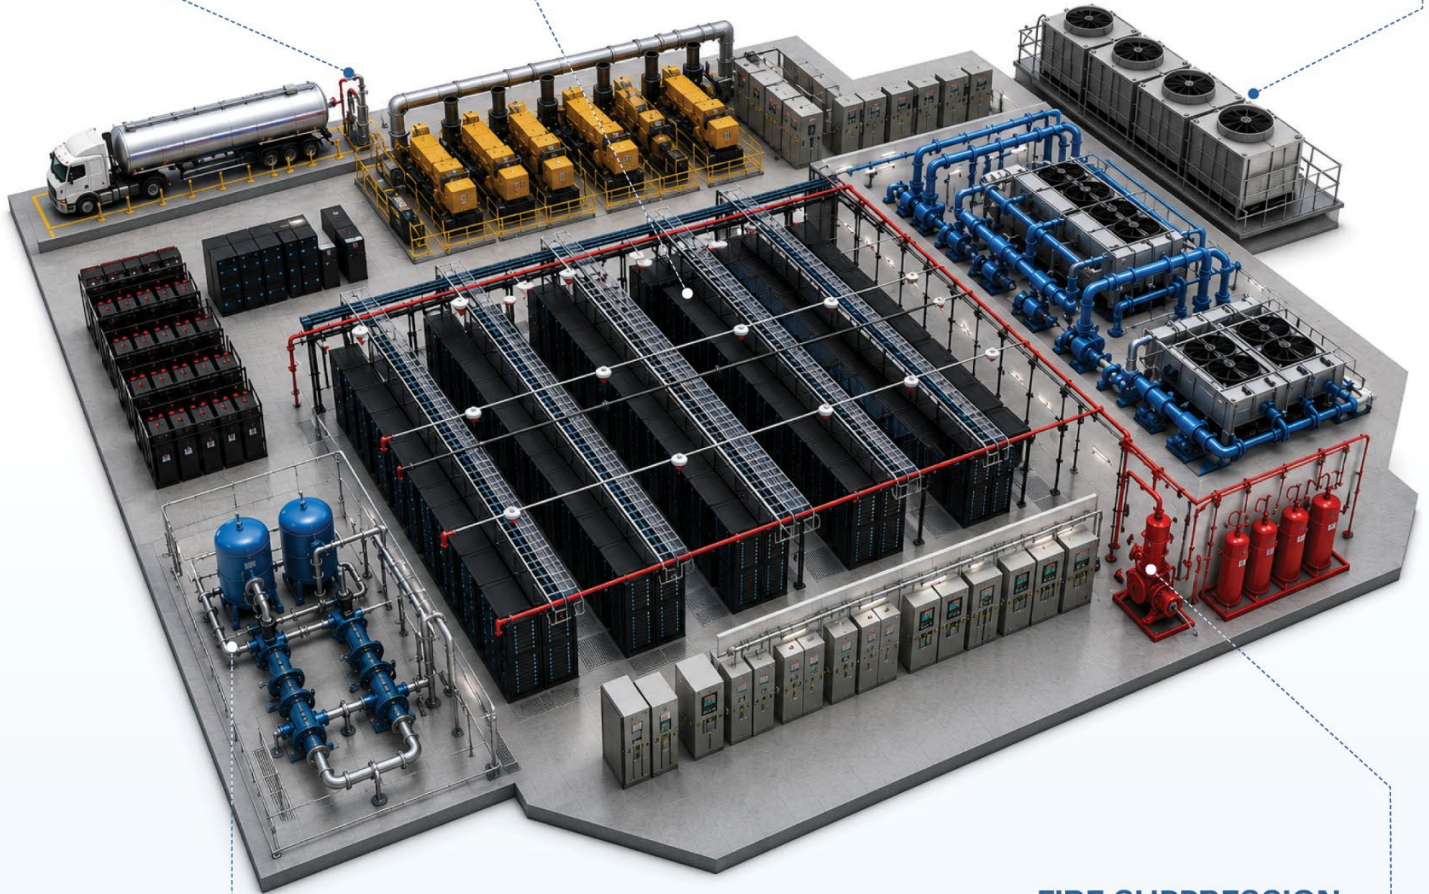

## FUELING & FUEL TRANSFER

## CDU & CHIP COOLING PUMPS

## HVAC PUMPS FOR CHILLER & COOLING TOWERS & BOILERS

## WATER SUPPLY & WASTEWATER TRANSPORT

## FIRE SUPPRESSION PUMPS

## APPENDIX – FIRE SUPPRESSION PUMPS

Patterson Pump manufactures a full line of UL/FM rated fire pumps and fire pump systems to supplement sprinkler pressures throughout data centers and other commercial properties. Patterson manufactures fire pumps in state-of-the-art facilities in Toccoa, GA and Mullingar, Ireland. Patterson fire pumps are installed and supported around the world by factory trained and authorized distributors who provide local support.

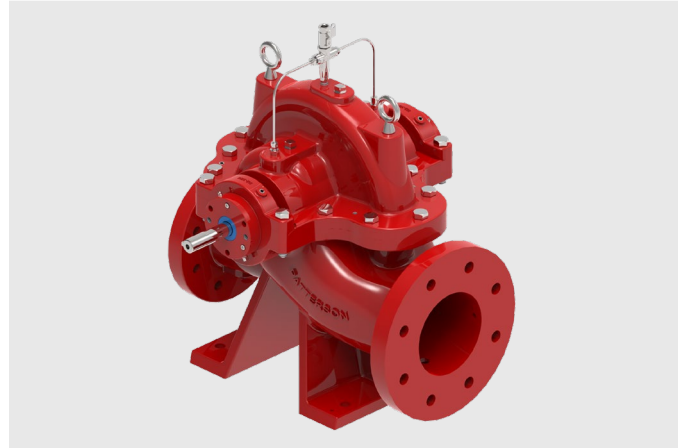

**Information on Patterson’s fire pump line can be found at:**

<https://pattersonpumps.com/wp-content/uploads/2024/10/Brochure-Fire.pdf>

## APPENDIX – HVAC PUMPS FOR CHILLER/COOLING TOWERS & BOILERS

Gorman-Rupp manufactures a full line of HVAC pumps and systems that circulate chiller and boiler fluids under the Patterson Pump brand in Toccoa, GA and Olive Branch, MS; under the AMT brand in Royersford, PA; and under the National Pump Company brand in Lubbock, TX and Glendale, AZ. HVAC products are sold directly to OEMs or through local factory trained and authorized distributors.

**Information on HVAC pumps can be found at:**

## APPENDIX – CDU/CHIP COOLING PUMPS

Gorman-Rupp Industries manufactures brushless DC magnetically coupled plastic and stainless-steel pumps for in rack or near rack computer cooling in a highly automated facility in Bellville, OH. AMT manufactures larger stainless-steel pumps for end of row cooling in Royersford, PA. Pumps are factory supported and sold either directly to CDU OEMs or to their third-party contract manufacturers.

**Information on pumps for computer cooling can be found at:**

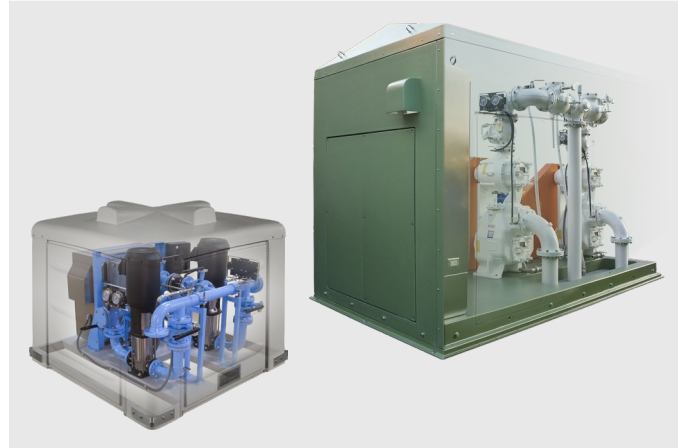

<http://47424622.hs-sites.com/integrity-series>

<https://amtpumps.com/site/product-category/straightcentrifugal/>

- Heavy Duty Straights: 424 Series, 425 Series, 426 Series
- Straight Centrifugals: 502 Series
- Small Straight Centrifugals: 368 Series
- High Head Straights: 489 Series
- The AMT models above are available in Stainless Steel, Cast Iron and select Bronze models

## APPENDIX – WATER SUPPLY/WASTEWATER TRANSPORT

Gorman-Rupp companies produce a comprehensive assortment of products to convey water to and away from data centers in Mansfield, OH; Toccoa, GA; Lubbock, TX and Glendale, AZ. Water and Wastewater products are supported around the world by a factory trained and authorized distributors.

**Information on water and wastewater pumping can be found at:**
